## Career Objective

Backend Developer with hands-on experience in Node.js (ExpressJS) and RESTful API development. Seeking an opportunity to participate in building and maintaining backend systems, develop scalable web applications, collaborate effectively within a team, and improve code quality through best practices and source code review.

## Education

### Can Tho University

Software Engineering Student

- > GPA: 3.39/4.0
- > Certifications: VSTEP English Certificate (B1/Level 3), TOEIC Certificate with score 470

Can Tho, Vietnam

09/2021 – 03/2026

## Experience

### Backend Developer Intern

CUSC - Cantho University Software Center

09/2025 – 11/2025

Can Tho, Vietnam

- > Customized and developed new features on Vtiger CRM to align with business requirements, improving overall process efficiency.
- > Collaborated on backend logic and database operations to ensure data accuracy and consistency.
- > Assisted in analyzing existing system structure and proposing improvements.
- > Collaborated with team members to review code and ensure feature stability.

## Projects

### E-commerce Phone Shop Web Application (12/2024 – 04/2025)

- > **Description:** Full-stack e-commerce web application for managing products, orders, payments, discounts, and reports.
- > Designed and developed RESTful APIs using Node.js and ExpressJS.
- > Implemented authentication and authorization using JWT.
- > Built backend logic for product, order, and user management.
- > Worked with MongoDB to design schemas and optimize queries.
- > **Technologies:** Node.js, Express.js, MongoDB/Mongoose, JWT, Redux Toolkit, Tailwind CSS, VNPay.

### Second-hand E-commerce Platform (05/2025 - 08/2025)

- > **Description:** Multi-vendor second-hand e-commerce platform with product moderation, advanced search/filter, real-time notifications.
- > Designed and implemented RESTful APIs using Node.js and ExpressJS
- > Built authentication, authorization, and role-based access control.
- > Integrated Redis for caching and token blacklist.
- > Integrated third-party services such as Cloudinary, Nodemailer, and Google Vision API.
- > **Technologies:** Node.js, Express.js, MongoDB, Redis, JWT, Socket.IO, Multer, Cloudinary.

## Skills

**Programming:** JavaScript, Java.

**Frameworks/Libraries:** Node.js, Express.js, Spring Boot.

**Frontend:** HTML, CSS, ReactJS, Tailwind CSS, Shadcn.

**Databases:** MongoDB, MySQL, PostgreSQL.

**Tools/Other:** Git, GitHub, Postman, Docker, Vercel.
